STRICTLY OBSERVE THE FOLLOWING GUIDELINES IN ORDER TO USE THE PRODUCT PROPERLY AND AVOID POTENTIALLY DANGEROUS ACCIDENTS.

STEP 1 Read and understand all steps in the instructions before starting the installation. Park the motorcycle on a hard, level surface and turn off the ignition. Let cool.

WARNING! YOU WILL BE WORKING AROUND THE ENGINE AND EXHAUST SYSTEM DURING INSTALLATION. ENSURE THAT THE ENGINE AND EXHAUST SYSTEM HAVE FULLY COOLED TO PREVENT INJURY.

STEP 2 Pull the choke knob all the way out.

STEP 3 Place the choke knob cover over the stock choke knob and put a small amount of silicone on the threads. Place the slotted lockplate over the choke cable and screw it into the cover as far as it will go. The flats cut on the back of the lockplate permit the use of a 3/4" wrench. Be careful, don't over tighten and break the plastic knob.

STEP 4 Check to be sure the choke control can be pushed in all the way to the full "off" position.

ATTENTION! It is the installer's responsibility to ensure that all of the fasteners (including pre-assembled) are tightened before operation of the motorcycle. Kuryakyn will not issue a warranty on components lost due to improper installation. Periodic maintenance may be required.
