STEP 3  Remove the backing from one of the included adhesive gaskets and install it onto the mouth of the throttle body, making sure all holes line up. PIC 1

STEP 4  Place the servo cover on the fuel injection making sure all the holes line up. PIC 2

STEP 5  If installing a new Küryakyn air cleaner and crankcase breather adapter, **DO NOT** install the O-ring in the groove in the crankcase breather adapter. (PIC 3), the new gasket from Step 6 will take it's place. If reusing a previously installed Küryakyn crankcase breather adapter, **REMOVE** the O-ring, the new gasket from Step 6 will take it's place.

STEP 6  Remove the backing from the second supplied adhesive backed gasket and apply it to the O-ring groove side of the crankcase breather adapter, making sure the three mounting holes line up. PIC 3 and PIC 4 Reinstall the air cleaner assembly in reverse order from disassembly. Refer to original air cleaner documentation for installation instructions.

**NOTICE** It is the installer’s responsibility to ensure that all of the fasteners (including pre-assembled) are tightened before operation of the motorcycle. Küryakyn will not warranty components lost due to improper installation. Periodic maintenance may be required.

STEP 7  Check to make sure that all fasteners are secure and the throttle works freely.
