**NOTICE**
Avoid damage to the motorcycle. Protect painted surfaces with a soft cloth or blanket.

**STEP 1**
Read and understand all steps in the instructions before starting the installation. Park the motorcycle on a hard, level surface and turn off the ignition. Let motorcycle cool.

**STEP 2**
On the underside of the Tour-Pak®, locate and remove the four hex nuts and washers; set the hardware aside for now, it will be reused.

On Trike models, due to limited clearance between the Tour-Pak mount and body, it is easier to complete this and all remaining steps if you remove the Tour-Pak and its mount as an assembly. To do so, locate and remove the six nuts inside the trunk that secure the Tour-Pak Mount to the body. You can now lift the Tour-Pak and its mount off the body and rest it on the seat where you can easily access and remove the four nuts securing the mount to the Tour-Pak.

**STEP 3**
Refer to PIC 1. Rest the Tour-Pak® on the seat and have a friend secure it while the Relocator Blocks are installed.

**STEP 4**
Locate the included Relocator Blocks; they are marked “Left Side” and “Right Side”.

**STEP 5**
Refer to PIC 1. Secure the Blocks to the underside of the Tour-Pak® with the hex nuts and washers removed in STEP 2. Torque the nuts to 60-72 IN-LBS (6.7-8.1 NM).

**STEP 6**  
Set the Tour-Pak® down on the support frame and align the holes.

On Trike models, carefully replace the Tour-Pak and mount assembly on the body and secure it with the six nuts removed in Step 2. Torque the nuts to 60-72 IN-LBS (6.7-8.1 NM)

There are three sets of holes in the Blocks allowing for three inches of adjustment.

The slot in the support frame allows for an additional one inch of adjustment.

Determine the desired location before securing the Tour-Pak® to the support frame.

**STEP 7**  
Refer to PIC 2. Insert the four included Screws, Lock Washers, and Flat Washers through the support frame and into the Tour-Pak® floor. Leave the screws loose until all four have been started in their threaded holes.

**STEP 8**  
Torque the screws to 60-72 IN-LBS (6.7-8.1 NM).

On Trike models, hold the mount against the Relocator Blocks and align the holes.
